

## CASE STUDY: AUXILIOR CAPITAL PARTNERS

### AT A GLANCE

#### Project Highlights

- 16' x 5" LED video wall with multi layout display presets
- 85" LCD secondary display
- Dual-cameras and integrated audio DSP for video conferencing
- Multi-zone audio via ceiling pendant speakers
- Integrated DSP, switching, and centralized rack infrastructure
- Two-room operation with combined or standalone modes
- Simple touch panel control for all system functions

#### Key Products

- ATS Pro LED Video Wall
- Extron 4K video routing
- Brightsign Multi-channel 4k Digital Signage
- QSC Audio DSP, PTZ Cameras and Control System
- Shure MXA Ceiling Microphones and SLXD Dual Channel Wireless Mics
- BiAmp pendant speakers and amplification

Thanks to AVT's expertise, the video wall in our Innovation Space has become a true centerpiece. The system's versatility and enhanced sound quality have transformed our meetings, improving collaboration and productivity. Great job AVT!

#### Kathie Capparelli

Chief Marketing Officer  
Auxilior Capital Partners

### OBJECTIVES

Auxilior Capital Partners enhanced its already impressive Innovation Space, taking its collaboration environment to new heights capable of supporting high-impact presentations, video conferencing, and digital content display. The space needed to function as both a primary presentation venue and a flexible overflow area, while remaining intuitive for users and reliable for daily business operations.

### SOLUTIONS

With the installation of the AVT system, Auxilior Capital Partners, future-ready collaboration space seamlessly supports executive presentations, hybrid meetings, and digital communications in one unified environment. The system delivers broadcast-quality visuals, clear audio, and seamless usability, empowering the team.

**Control Systems:** Tabletop touch panels with preset room modes allow faculty to instantly reconfigure divisible spaces with a single tap

**Integrated Teaching Podiums:** Each podium is fully equipped with a PC, monitor, microphone, webcam, HDMI input, and cable cubby so every room is ready for instruction

**Audio Coverage:** Ceiling and boundary microphones plus hearing assistance technology ensure speech is clear and accessible in every seat

### RESULTS

- **User Experience:** Intuitive touch panel controls make it easy for anyone to manage sources, layouts, audio, and cameras without technical expertise
- **Performance:** Integrated video wall, audio, and conferencing systems deliver clear visuals and reliable communication for meetings and presentations
- **Flexibility:** Main and side spaces can operate independently or combine seamlessly for larger events and collaboration needs
- **Future Readiness:** Scalable infrastructure and centralized architecture ensure the system can grow with evolving technology and workplace demands
