

APPLIED VIDEO TECHNOLOGY SERVICES FOR GOVERNMENT

Applied Video Technology is proud to assist our customers in the design, installation, training and support of your audio visual and communication technology needs.

At AVT we know how important communication is in government. We offer guidance, expertise and services which allow governments the ability to better connect with the citizens they serve. Through our years of experience working with governments at all levels we have created a unique set of offerings for our government clients

SERVICES TO HELP YOUR MUNICIPALITY

- Audio visual installations in board and chamber meeting halls
- Community meeting space audio systems
- Creation and management of your own public access channels
- Live streaming and video on-demand portals for your public meetings
- Digital Signage systems for building wide communications
- Community TV Stations
- And more!

We can even provide staff to professionally record, produce and share your monthly board meetings on your public access channel or for online viewing by your residents. In addition to all this we also work with various government entities for all their digital marketing and media needs.
